- Agile
- Integration readiness analysis

Work History

Software Developer, 03/2023 to 02/2024

eBOS – Remote

- While employed at eBos, I played an integral role in the development of their software platform, WiseBos suite.
- This platform offers comprehensive RegTech and FinTech solutions aimed at automating risk and compliance management processes for organizations.
- My responsibilities involved leveraging a strong skill set in ASP.NET, Microsoft SQL Server, JQuery, and GitHub to effectively contribute to the advancement and functionality of the WiseBos suite.
- In my recent project, I independently developed a timesheet application.
- Whose main function was to extract employee working hours from Excel files and integrate them seamlessly into the database. Thereby improving the efficiency of data management.
- Initially, I designed the application as a console application. Later, I extended its capabilities by creating a user interface using WPF (Windows Presentation Foundation) applications. Which was achieved through the integration of a DLL (Dynamic Link Library)

This experience at eBos significantly improved my knowledge in,

- **Regulatory Compliance:** I gained experience in implementing software solutions that adhere to regulatory requirements such as KYC (Know Your Customer), AML (Anti-Money Laundering), or financial reporting standards.
- **Agile Methodologies:** we use the agile development methodologies to quickly adapt to changing market conditions and regulatory requirements.
- **Time management:** I had to juggle lots of different tasks and meet deadlines for project work. Learning how to prioritize what needed to be done when was a big part of it.

Web Developer, 05/2022 to 07/2022

Lahkam – Douala, Cameroon

- Created a website for an NGO called Young and Creative whose goal was to promote their event, their actions and to accept donations through the website.
- Collected, defined and translated user requirement into project design and implementation plans.
